PROFESSIONAL SUMMARY

Computer Science Engineering student with strong foundation in software development, cloud concepts, and AI.

Skilled in problem-solving, solution design, and communication. Experienced in client engagement, team collaboration, and driving adoption of technology solutions. Seeking opportunities to bridge technical depth with business value.

PROFESSIONAL EXPERIENCE

Front-end Development Intern

09/2025 – 10/2025

TechieHelp [🔗](#)

Remote

- Built **Eventra**, a Next.js-based platform for booking event vendors, featuring a custom search engine and vendor detail pages.
- Implemented secure authentication and multi-step checkout flows using Formik for state management and Yup for validation.
- Delivered a fully responsive, dark-mode compatible UI deployed to Vercel as the final internship deliverable.

Intern - Sales & Marketing

11/2024 – 01/2025

Adval Studios

Hybrid

- Supported lead generation, client engagement, and campaign execution.
- Worked cross-functionally to optimize outreach and value delivery.

Discipline Committee Member

08/2023 – Present

SRM IST (DSA)

- Assisted in tech fest and official events, ensuring smooth operations.

EDUCATION

Bachelor of Technology in Computer Science and Engineering (Core)

05/2027

SRM Institute of Science and Technology, Chennai, TN

High Schooling

04/2016 – 05/2023

Krishna Public School, Raipur, CG

CORE COMPETENCIES & TECHNICAL SKILLS

Technical

C++ (DSA, OOP), Python (Pandas, NumPy, Scikit-learn, TensorFlow), SQL, Flask, REST APIs, HTML/CSS/JavaScript, Git, Vercel.

Business

Client Relationship Management, Communication, Team Leadership, Project Management, Reporting and Documentation.

Problem-Solving

Debugging, Algorithm Design, Data Analysis, Solution Architecture.

PROJECTS

Conformal Health Risk Prediction [🔗](#)

07/2025 – 11/2025

RiskBound AI

- **Uncertainty Quantification:** Implemented a Conformal Prediction framework using the MAPIE library to wrap standard classifiers, ensuring calibrated prediction sets with customizable confidence levels (e.g., 90-95%).
- **Full-Stack ML Engineering:** Integrated data preprocessing pipelines (imputation, scaling) directly into a Streamlit application, enabling real-time inference and dynamic visualization of patient vitals.

- Tech Stack: Utilized Python, Scikit-learn, XGBoost, and MAPlE for modeling, with Joblib for model persistence and Altair for interactive data visualization.

AI Career Guidance System

01/2025 – 05/2025

Academic Project

- AI-driven platform recommending careers based on user profile, education, and interests.
- Built ML pipeline (Random Forest 83.2%, Neural Network 87.5%, K-Means clustering).
- Developed Flask backend + responsive web interface; integrated real-time job data.
